

FILEENGINE®: IT'S MORE THAN A SERVER, IT'S A PROMISE™

No IT Staff? No Problem.

Servers are too complicated. They are too expensive, and when they break, they cost too much to repair. If you had a choice, you wouldn't want to own one. Now you have a choice: choose FileEngine.

Your organization needs a server to reliably share information. But you need to keep some information private. You need to centralize where you store your information so you can make sure it gets backed up. You want a reliable server that never needs service. And you don't like restrictive licenses – why should you have to pay for each user?

FileEngine is what you've been looking for. Let us worry about your server.

Simple • Safe • Secure • Smart

**The Linux Server
designed for every
organization that
wants to stop
worrying about
their server.**

Our unique value proposition:

- We deliver & install the server
- We monitor & administer it
- We install updates
- We replace it if it breaks
- One predictable monthly payment
- The only *feature* rich server appliance that is also *service* rich
- No per-user license costs
- No license audit risks
- No server repair bills
- No excuses about server reliability
- The only server that includes the WatchBot™ monitoring system and Connection Wizard™ for seamless Windows + Linux integration

KEY FEATURES OF FILEENGINE:

- Powered by Progeny Debian GNU/Linux for non-stop file power!
- Integrated backup using portable and inexpensive DVD media
- Redundant hard drives
- 4 line LCD & 4 button control panel
- Uninterruptible Power Supply (UPS/Battery-Backup) included
- Remote administration & monitoring
- Unlimited users
- Works with all versions of Windows & Mac OS X
- Automated updates
- Standard installation, configuration & maintenance included

OPEN SOURCE SOFTWARE VALUE - FEATURE RICH AND SERVICE RICH

FileEngine is the first server to fully deliver the benefits of Linux and the Open Source phenomenon to small businesses and non-profits. FileEngine is the right choice if your network is expanding and you're considering a server to enhance data security and provide centralized backup. It is also the right choice for organizations that need to increase the number of users on their network, but don't want to increase their licensing and maintenance costs. And for Windows NT and Novell Netware customers, FileEngine is definitely the right choice for long-term productivity and reliability.

Our value proposition is simple: Let us worry about your server. For a low, predictable cost per month we deliver, install, configure, integrate, monitor and maintain your FileEngine. No tricks, no gimmicks.
